## New bag for EVAC evacuation hood

Announcement

STOCKHOLM

2018

Information about the new bag for EVAC evacuation hood.

### Description

Part number for the new bag is 34801-51.

Part numbers for the EVAC hood with the bag are:

35079-01	EVAC hood	IS female connection
35079-02	EVAC hood	Euro male connection
35079-03	EVAC hood	IS male connection

The D-ring in the center of the rear of the bag can be used for the shoulder strap [pos A] (included). An alternative to shoulder strap is a carabiner hook (not included) to quickly attach the bag to the breathing apparatus.

The two oblong velcro straps [pos B] can also be used to attach the bag to the device's hip belt. This takes a little longer, so it is useful if the fireman always carry the bag. The bag is fitted with reflexes on the side and on the lid. The reflex on the lid helps the fireman find the tab that you grab and pull in to open the bag. Old part numbers of the EVAC hood with the blue bag will be phased out. These numbers are 32382-01, -02, -03, -04.
