Spiroline HP hose material now in black with improved antistatic properties.

STOCKHOLM 24 September, 2015

BACKGROUND

The Spiroline HP hose has been upgraded with a black hose material with better antistatic properties.

The characteristics of the new hose materials is equal to the yellow hose material used in the DP1 hoses and only differ in improved antistatic properties and color. The same service instructions and service life regulations applies to the new hose material.

The part numbers for complete Spiroline HP assembly with P+ regulator of different types and lengths are the same as before. However the exchange hoses have new part numbers.

The yellow hose will still be used in diving applications such as Divator DP1.
