

Interspiro Academy - eLearning

Learning made easy

Interspiro eLearning is the perfect tool for individuals and organizations to continuously develop competence around our products. With the built-in statistics it is also the perfect solution to keep track of available competence.

The web based on-line solution brings you knowledge when and where it is most suitable for you, without restricting your daily operations. Interactive courses with step-by-step instruction uses videos and pictures to give invaluable understanding how to use and service our products.

Interspiro Academy - eLearning

One system – for all your competence

Control

The eLearning system gives a full overview of the knowledge and competence both at individual level and at organization level. In relation to completed courses an adaptive learning process will ensure continuous increase of knowledge. Statistics are easily available at all times, both for individuals and the complete organisation, and can show available competence for specific products.

Planning

With the training course catalog directly accesible you can choose when, where and how to continue your training. By setting up groups you can organize your own courses internally and recommend relevant participants.

Daily benefits

You get personal access to documentation based on your user profile. Embedded videos gives you step-by-step instructions on how to use and service the products. By using the eLearning system you are sure to always use the latest available doucumentation and information.

Daily operatations are not restricted, even in the middle of a course you can respond to an emergency and then just continue where you left it.
