

Spirocom GRA

This product is not available for sale in the
US or Canada.

Spirocom GRA (Generic Radio Adapter) is a radio adapter that can be connected to most well-known long range radios on the market. The Spirocom system is built to handle the difficult conditions at a fire scene and still deliver high quality sound.

The short cable is equipped with a connector that connects to the contact of the long range radio. A robust fastening clip is available as an accessory to secure the adapter to a carrying pocket.

The buttons and display is used to set the group number. Group setting is made in advance and remembered by the unit, on the way to an incident the only required action is to start the system. During use the adapter has a safety lock to eliminate the risk of activating the buttons by mistake when the radio is carried in a pocket.

On the top of the unit there is a connection for auxiliary equipment, such as external PTT or lapel speaker/microphone.

- Display showing group number setting
- Buttons to switch between group numbers
- Contact for connection of accessories
